

Repair Job Workflow SOP

Consumer Electronics & Appliances

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Writes a repair job workflow SOP — intake and job-card with fault/condition, diagnosis and estimate/approval, repair, quality-test, and delivery with warranty — so repairs are consistent, disputes are avoided, and turnaround is fast. Use it to run the workshop. For TAT use the Turnaround Time & Job Tracking tool.

Purpose of this tool & output

Standardise intake-to-delivery repair jobs

How the output is used

Use it to standardise intake-to-delivery repair jobs — a repair-job workflow SOP with diagnosis, estimate, approval and delivery.

Important cautions

A detailed job-card noting condition and accessories with customer sign-off at intake prevents most service disputes; always get estimate approval before paid repair, test before delivery, and give a warranty on the repair.
