

Service Pricing & Estimate

Consumer Electronics & Appliances

Document type: Plan / SOP / strategy / guide · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a service pricing approach — visit/diagnosis charge, labour rates by job, genuine-parts pricing, and transparent estimates — so repairs are priced profitably and transparently without disputes or losing to cheap local repairers. Use it to set service pricing. For the workflow use the Repair Job Workflow SOP.

Purpose of this tool & output

Price repairs to be fair and profitable

How the output is used

Use it to price repairs to be fair and profitable — an estimate approach covering parts, labour and margin without overcharging.

Important cautions

Position on genuine parts, skilled repair and warranty to justify a premium over cheap informal repairers who use local parts and give no warranty; a transparent written estimate prevents disputes.
