

Spare Parts Management

Consumer Electronics & Appliances

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a spare-parts management system for the service centre — which fast-moving genuine parts to stock, sourcing (brand/authorised), min-max, warranty-part handling, and pilferage control — so repairs are completed fast with genuine parts and cash is not stuck. Use it to run parts. For the workflow use the Repair Job Workflow SOP.

Purpose of this tool & output

Stock the right genuine parts for fast repair

How the output is used

Use it to stock the right genuine parts for fast repair — spare-parts management that cuts turnaround and avoids fakes.

Important cautions

Stock genuine fast-moving parts from authorised sources (counterfeits fail and harm your name), link parts to jobs and control high-value small parts against pilferage; stockouts delay repairs and lose customers.
