

Vendor Payment & Scheme Reconciliation

Consumer Electronics & Appliances

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a system to reconcile vendor/brand accounts — purchases and payments, scheme/rebate credits, price-protection, DOA/defective credits and warranty payouts — so brand ledgers are clean and every due is collected. Use it to control brand accounts. For scheme decisions use the Brand Scheme & Claim Management tool.

Purpose of this tool & output

Reconcile brand payments, schemes and claims

How the output is used

Use it to reconcile brand payments, schemes and claims — a reconciliation routine so every scheme, rebate and claim is actually collected.

Important cautions

Reconcile brand ledgers regularly to catch un-credited schemes, price-protection and DOA credits — these are routinely missed and are real recovered margin. Match every claim to a credit note and follow up shortfalls.
