

Module Cleaning Schedule

Energy, Power & Renewables

Document type: Plan / SOP / strategy / guide · Generated 29 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a module cleaning schedule for a solar plant — frequency based on soiling and season, method (water, dry, robotic) and water/safety considerations — with a note to monitor soiling loss and optimise frequency. Use this to protect generation without wasting water.

Purpose of this tool & output

Cleaning that protects generation

How the output is used

Use it to protect generation with the right module-cleaning schedule — frequency by dust and season, method and safety.

Important cautions

AI-generated schedule; adapt to site soiling and water availability.
