Detailed Project Report (DPR)

Energy, Power & Renewables

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Structures a bankable Detailed Project Report (DPR) for an energy project — executive summary, technical design, resource assessment, land and grid, cost estimate, financials, implementation and risk — with what lenders look for. Use this to prepare a financing-ready document. For the earlier viability screen use the Power Project Feasibility tool.

Purpose of this tool & output

Structure a bankable DPR

How the output is used

Use it to structure a bankable Detailed Project Report — technical design, costs, financials, approvals and risks — that a lender or investor can appraise.

Important cautions

AI-generated structure; a DPR needs detailed engineering and financial modelling.

Companion documents

- Power Project Feasibility
- EPC Contract (Power Project)
- Power Purchase Agreement Guide
- Project Finance Structuring
- Land & Site Acquisition Guide
- Grid Connectivity Guide
