

Energy Business KPI Dashboard

Energy, Power & Renewables

Document type: Plan / SOP / strategy / guide · Generated 28 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Defines a practical KPI set and review cadence for an energy business — for each KPI the formula, why it matters and a benchmark hint — covering capacity installed, pipeline, cost per watt, project margin, O&M performance ratio, collection and CAC. Use this to build a dashboard. Set targets from your own history.

Purpose of this tool & output

Track the metrics that run the business

How the output is used

Use it to track the metrics that run the business — pipeline, conversion, project margin, O&M performance and cash — on one dashboard.

Important cautions

AI-generated framework; set targets from your history.
