

Net Zero Roadmap

Energy, Power & Renewables

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a net zero roadmap framework for a business — baseline, targets, reduction levers (efficiency, renewables, electrification), residual offsets and a timeline — with interim milestones and governance (tracking, disclosure). Use this to plan a credible path to net zero. Set science-based, honest targets. For the current emissions baseline use the Carbon Footprint Calculator.

Purpose of this tool & output

Plan a credible path to net zero

How the output is used

Use it to plan a credible path to net zero — baseline, targets, levers (efficiency, renewables, offsets) and a phased roadmap.

Important cautions

AI-generated roadmap; set science-based, honest targets.
