AISEVAK.IN · FREE GUIDE

Energy Business P&L Builder

Energy, Power & Renewables

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a structured P&L for an energy business — line-by-line revenue against equipment cost, installation, O&M, staff, marketing and other costs — with key ratios (gross and net margin) and insights. Use this to see your business profitability clearly. It complements, not replaces, your accountant.

Purpose of this tool & output

A clear P&L for your energy business

How the output is used

Use it to build a clear P&L for your energy business — revenue lines, costs, margins and profit — for planning or a loan file.

Who should vet it

Your chartered accountant (CA), to align the P&L with your books before it goes into a loan file or an investor pack.

Important cautions

AI-generated statement; not a substitute for your accountant.
