REC & Green Attributes Guide

Energy, Power & Renewables

Document type: Plan / SOP / strategy / guide · Generated 28 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Explains Renewable Energy Certificates (RECs) for a generator or obligated entity — what RECs are (solar and non-solar), how they trade on exchanges, eligibility (registration, accreditation) and use (meet RPO or monetise the green attribute). Use this to understand and monetise RECs. REC rules change; confirm the current CERC framework. For RPO itself use the RPO Guide.

Purpose of this tool & output

Monetise renewable energy certificates

How the output is used

Use it to monetise renewable energy certificates (RECs) — eligibility, registration, trading on the exchanges and the accounting basics.

Important cautions

AI-generated guide; REC rules change, confirm current CERC framework.
