

Energy Savings Report

Energy, Power & Renewables

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds an energy savings report documenting implemented measures — baseline vs after (energy and cost), savings achieved (units, rupees, payback), CO2 reduction and a measurement-and-verification approach. Use this to prove and communicate savings to management or for a green-loan / incentive claim.

Purpose of this tool & output

Document and prove savings

How the output is used

Use it to prove and communicate savings — baseline vs after, units and rupees saved, CO2 reduction and an M&V approach — for management or a green-loan claim.

Who should vet it

A BEE-accredited auditor or your CA, when the report backs a green-loan claim or an incentive filing.

Important cautions

AI-generated report; use measured data for verification.
