

Electricity Tariff Analyzer

Energy, Power & Renewables

Document type: Financial model / analysis · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Analyses an electricity tariff and bill to find savings — breaking down components (energy, demand, TOD, PF, surcharges), the cost drivers and optimisation levers (category, demand, TOD shifting, solar, open access). Use this to understand and cut your tariff cost. Confirm against your DISCOM tariff schedule.

Purpose of this tool & output

Understand and optimise your tariff

How the output is used

Use it to understand and optimise your tariff — category, slabs, demand and ToD charges — and to find the cheapest compliant option.

Who should vet it

An energy consultant familiar with your state tariff order, to confirm the category and the applicable charges.

Important cautions

AI-generated analysis; confirm against your DISCOM tariff schedule.
