

Technician Training Program

Energy, Power & Renewables

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Designs a technician training program for an energy or solar business — modules (fundamentals, installation, electrical safety, O&M, troubleshooting) with methods, certification awareness (Suryamitra / skill certification) and a strong electrical-and-height safety focus. Use this to build skilled, safe installers. Electrical work needs certified training.

Purpose of this tool & output

Build skilled, safe installers

How the output is used

Use it to build skilled, safe installers — a training program with modules, hands-on skills, safety and an assessment.

Important cautions

AI-generated program; electrical work needs certified training.
