

EC Category / Applicability Screener

Environment & Waste Management

Document type: Financial model / analysis · Generated 29 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get help determining whether a project needs Environmental Clearance and its likely category (A/B1/B2) — based on the schedule activity, capacity and location — so you know the route before you start. Describe the project below.

Purpose of this tool & output

Find if and which EC you need

How the output is used

Use it to find if and which EC you need — a screening of the project against the EIA schedule to determine Category A, B1 or B2.

Who should vet it

A NABET-accredited EIA consultant, to confirm the category and applicability before you plan the clearance route.

Important cautions

AI-generated screening; thresholds and the schedule change - verify current EIA Notification and confirm with an accredited consultant.

Companion documents
