This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get an ESG due-diligence framework for a target company or key supplier — the environmental, social and governance risks to check, red flags, and a scoring/findings format — for an investment, acquisition or supplier onboarding. Describe the subject below.

Purpose of this tool & output

Assess ESG risk in a target or supplier

How the output is used

Use it to assess ESG risk in a target or supplier — an ESG due-diligence that surfaces environmental and social risks before a deal or onboarding.

Who should vet it

An ESG advisor or the deal legal/technical team, to validate the risk findings before relying on them in a transaction.

Important cautions

AI-generated framework; conduct actual document review and site verification.
