

GHG Accounting Setup

Environment & Waste Management

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get a framework to set up ongoing GHG accounting for a company — data systems, emission factors, calculation methodology, boundaries and reporting cadence — so carbon is measured repeatably, not one-off. Describe the company below.

Purpose of this tool & output

Set up ongoing carbon accounting

How the output is used

Use it to set up ongoing carbon accounting — the boundaries, data flows and process to track emissions year on year.

Important cautions

AI-generated framework; use recognised emission factors and validate the methodology.

Companion documents
