

Capital-Gains Computation (Securities & Assets)

Finance & Accounting

Document type: Financial model / analysis · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Computes capital gains on shares, mutual funds, gold and other non-property assets — holding period, indexation, 111A/112A rates and loss set-off. Use it to work out your capital-gains tax. For a secondary/buyback, use the Secondary Sale / Buyback Analyzer.

Purpose of this tool & output

Compute gains on shares, mutual funds and other assets (non-property)

How the output is used

Use it to compute capital gains on shares, mutual funds and other non-property assets, with holding period and indexation where relevant.

Who should vet it

Your CA, to confirm the holding-period, cost and exemption treatment before you file.

Important cautions

Rates and indexation rules changed in recent Finance Acts; confirm the year-specific rate with a CA.
