

Freight & Utility Bill Audit

Finance & Accounting

Document type: Financial model / analysis · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Audits freight and utility invoices for overcharges — wrong tariff/slab, unjustified accessorial, duplicate surcharges and penalty errors — with the overcharge and dispute points. Use it to recover on recurring logistics/utility bills. For PO-vs-invoice overbilling, use the Overbilling & Pricing-Error Audit.

Purpose of this tool & output

Scan freight and utility invoices for tariff and accessorial errors

How the output is used

Use it to scan freight and utility invoices for tariff and accessorial errors that overcharged you.

Who should vet it

Your logistics or facilities owner, to confirm the tariff terms before you dispute the charges.

Important cautions

Compare against the contracted rate card and regulator tariff before disputing.
