

Fish / Shrimp Supply Agreement

Fisheries & Aquaculture

Document type: Contract / agreement · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Drafts a supply agreement between a producer and a buyer (processor, trader or retailer) — volume, quality, price, payment and food-safety terms. Use it to formalise a supply relationship.

Purpose of this tool & output

Contract to supply a buyer

How the output is used

Use the draft to agree volume, quality (count/residue), price mechanism, payment and who bears residue liability with a processor or trader before harvest.

Who receives it

The supplier (farmer) and the buyer (processor/trader) — both sign.

Fees & charges

Stamp duty per your state for the agreement; no government filing needed.

Who should vet it

A lawyer for the rejection, residue-liability and payment-security clauses (these carry real financial and export risk).

Important cautions

A draft template, not legal advice; residue-liability and rejection and payment-security terms are commercially sensitive. Have a lawyer review and adapt it and confirm stamping before signing.
