

Aquaculture Contract Farming Agreement

Fisheries & Aquaculture

Document type: Contract / agreement · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Drafts a contract-farming agreement between an integrator (feed or processor company) and a farmer — inputs on credit, technical support, buy-back price and quality — sharing risk fairly. Use it for integrated aqua contract farming.

Purpose of this tool & output

Integrator and farmer tie-up

How the output is used

Use the draft for an integrator and farmer tie-up — inputs, technical support, buy-back price, quality and risk with discrete terms — reviewed by a lawyer.

Who receives it

The agreement is between the integrator and the farmer; each keeps a signed copy.

Fees & charges

Stamp duty per your state stamp act where applicable; the buy-back price, input-supply and risk-allocation terms are the key content.

Who should vet it

A lawyer, to check the buy-back price, risk-allocation and default clauses before signing.

Important cautions

A draft template, not legal advice; contract-farming terms on input recovery, buy-back and disease risk are sensitive and can disadvantage farmers if unbalanced. Have a lawyer review and ensure fair, enforceable terms before signing.
