

Crop Cycle Calendar

Fisheries & Aquaculture

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a crop-cycle calendar — stocking and harvest windows, number of crops, pond preparation and fallow, aligned to season, price and disease. Use it to plan the year and cash flow.

Purpose of this tool & output

Plan crops across the year

How the output is used

Use it to plan crops across the year — a crop cycle calendar across stocking, culture, harvest and pond rest.

Important cautions

Windows depend on local climate, water, disease history and price; monsoon and extreme heat raise risk. Adjust to your microclimate and market and keep a fallow and buffer for bad crops.

Companion documents
