

Effluent & Environmental Management Plan

Fisheries & Aquaculture

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds an effluent and environmental management plan for a farm or processing unit — effluent treatment, sludge, discharge norms, mangrove and CRZ care — to stay compliant and sustainable. Use it to meet CAA and PCB conditions.

Purpose of this tool & output

Manage farm and plant effluent

How the output is used

Use it to manage farm and plant effluent — an effluent and environmental management plan that meets discharge norms.

Important cautions

Effluent and environmental norms vary by state PCB and CAA and change and are enforced; violations risk closure and demolition. Confirm your discharge norms and treatment design with the authorities and a qualified environmental consultant.
