

Aquaculture Farm Setup Plan

Fisheries & Aquaculture

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces an end-to-end farm setup plan — ponds, water and aeration, seed and feed, power, labour, biosecurity and first-crop readiness. Use it to build and commission a farm.

Purpose of this tool & output

Set up a fish or shrimp farm end to end

How the output is used

Use it to set up a fish or shrimp farm end to end — a farm setup plan across ponds, water, aeration, inputs and licences.

Important cautions

An operating plan, not a guarantee of yield; pond preparation, water quality and seed quality drive first-crop success. Complete registrations and soil and water testing before stocking and follow local expert advice.
