

Harvest & Post-Harvest Plan

Fisheries & Aquaculture

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a harvest plan — timing and size, partial or full, draining and netting, ice and handling, grading, and logistics to buyer or plant — to protect quality and price. Use it before harvesting.

Purpose of this tool & output

Plan a clean, well-timed harvest

How the output is used

Use it to plan a clean, well-timed harvest — a harvest and post-harvest plan that protects count, quality and price.

Important cautions

Harvest timing trades growth against price and disease risk; poor chilling loses value and export eligibility fast. Confirm antibiotic-residue withdrawal periods and buyer requirements before harvest.
