

Hatchery Setup Guide

Fisheries & Aquaculture

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a hatchery setup plan — broodstock, tanks, water and biosecurity, larval rearing, feed and licensing — for fish or shrimp seed production. Use it to plan a hatchery.

Purpose of this tool & output

Set up a fish or shrimp hatchery

How the output is used

Use it to set up a fish or shrimp hatchery — a hatchery setup guide across broodstock, larval rearing, water and biosecurity.

Important cautions

Hatcheries are technically demanding and biosecurity-critical; disease introduced via broodstock or water can wipe out a run. Use SPF or certified broodstock, PCR screening and expert hatchery technicians, and confirm licensing with the CAA.
