

Fish Health Management Plan

Fisheries & Aquaculture

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a preventive fish-health programme — water and nutrition, stress reduction, monitoring, quarantine and record-keeping — so disease is prevented, not chased. Use it to run a healthy farm.

Purpose of this tool & output

A preventive health programme

How the output is used

Use it as a preventive health programme — a fish health management plan across biosecurity, nutrition, monitoring and response.

Important cautions

Prevention centred on water and nutrition beats treatment; treatments must avoid banned substances and observe withdrawal periods. Consult a fish-health specialist for diagnosis and any medication.
