

Mortality Investigation Guide

Fisheries & Aquaculture

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Guides a structured investigation of a fish or shrimp mortality event — timeline, water, feed, behaviour and clinical signs — to find the likely cause and stop losses. Use it when mortality spikes.

Purpose of this tool & output

Find the cause of a die-off

How the output is used

Use it to find the cause of a die-off — a mortality investigation guide across water, disease, feed and management factors.

Important cautions

A structured framework, not a diagnosis; many die-offs are water-driven (oxygen crash after rain or bloom collapse) and fixable. Send fresh samples to a lab or specialist promptly to confirm before treating.

Companion documents

- Fish Disease Diagnosis Guide
- Fish Health Management Plan
- Antibiotic & Residue Compliance Guide
- Water Testing Protocol
- Probiotic & Bioremediation Plan
- Biosecurity Audit
