

Nursery & Grow-out Transition Plan

Fisheries & Aquaculture

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a nursery-phase plan — nursery ponds or tanks, acclimatisation, feed, monitoring and transfer to grow-out — to raise survival and uniformity. Use it to improve stocking success.

Purpose of this tool & output

Run a nursery phase before grow-out

How the output is used

Use it to run a nursery phase before grow-out — a nursery and grow-out transition plan that raises survival and uniformity.

Important cautions

Nursery success depends on seed quality, water and careful acclimatisation; abrupt transfer causes shock and loss. Screen seed, acclimatise gradually and follow a local hatchery or technician for species-specific timings.
