

Seed / Hatchery Supply Agreement

Fisheries & Aquaculture

Document type: Contract / agreement · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Drafts an agreement between a hatchery and a farmer for supply of seed or post-larvae — quality, health screening, quantity, price and replacement on failure. Use it to secure quality seed with recourse.

Purpose of this tool & output

Contract to buy seed or post-larvae

How the output is used

Use the draft to contract to buy seed or post-larvae — quality, PCR screening, count, price and liability with discrete terms — reviewed by a lawyer.

Who receives it

The agreement is between the hatchery/supplier and the farmer (buyer); each keeps a signed copy.

Fees & charges

Stamp duty per your state stamp act where applicable; the quality/PCR-screening, count and liability terms are the key content.

Who should vet it

A lawyer, to check the quality-PCR, replacement and liability clauses before signing.

Important cautions

A draft template, not legal advice; seed quality is decisive and replacement terms are hard to enforce once stocked. Insist on PCR or SPF documentation and have a lawyer review the recourse clauses before signing.
