

Shrimp Disease Management Guide

Fisheries & Aquaculture

Document type: Plan / SOP / strategy / guide · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Explains major shrimp diseases — white spot, EHP, running mortality, vibriosis, white gut — their signs, prevention and response, without prescribing banned drugs. Use it to protect a shrimp crop.

Purpose of this tool & output

Prevent and respond to shrimp disease

How the output is used

Use it to prevent and respond to shrimp disease — a shrimp disease management guide across prevention, early signs and response.

Important cautions

Not a veterinary diagnosis; get a lab or specialist to confirm before acting. Never use banned antibiotics (for example nitrofurans, chloramphenicol) — they cause export rejection and are illegal; focus on prevention, water and biosecurity.
