

Shrimp Farming Guide

Fisheries & Aquaculture

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a complete shrimp-farming guide — pond preparation, seed, water and feed, health and harvest — tuned to vannamei or tiger prawn in India. Use it as the master playbook for a shrimp crop.

Purpose of this tool & output

Start and run a shrimp farm

How the output is used

Use it to start and run a shrimp farm — a shrimp farming guide across pond, water, feed, health and harvest.

Important cautions

Shrimp farming is high-return but high-risk; a single disease outbreak can wipe out a crop. Use SPF or PCR-tested seed, strong biosecurity and reservoirs, and consult a local aqua technician throughout.

Companion documents
