

Species Selection Advisor

Fisheries & Aquaculture

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Recommends which fish or shrimp species to farm for your water, market and skills — comparing growth, price, disease risk and demand. Use it to choose what to stock.

Purpose of this tool & output

Pick the right species to farm

How the output is used

Use it to pick the right species to farm — a species selection advisor across water, climate, market and disease risk.

Important cautions

Suitability depends on your exact water, salinity and climate; some species (for example certain tilapia strains) need state permission. Confirm seed quality and source and market price locally before stocking.
