

Packaged Food Product Line Builder

Food Service, Restaurants & Cloud Kitchens

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a plan to launch packaged food products under your food brand — product selection, manufacturing, FSSAI/labelling/shelf-life, packaging, pricing and distribution. Use it to extend into retail/FMCG. For overall diversification use the Diversification Advisor.

Purpose of this tool & output

Extend your brand into packaged products

How the output is used

Use the builder to extend your brand into packaged products.

Important cautions

A packaged-food line extends the brand into FMCG but is very different from a restaurant — it needs a manufacturing-grade FSSAI licence, validated shelf-life, food-safety testing, and compliant labelling (FSSAI number, veg mark, nutrition, MRP, best-before, batch). Consider co-packing to start. Confirm manufacturing FSSAI and labelling requirements.
