

BIS / Quality Standards Guide

Furniture & Home Furnishings

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Explains relevant quality and safety standards for furniture and inputs — plywood and board grades, finishes, mattress and furniture standards and testing — to build quality and win B2B. Use it to meet standards. For quality control use the Quality Control & Finish Standards tool.

Purpose of this tool & output

Meet quality and safety standards

How the output is used

Use it to meet quality and safety standards — a BIS and quality standards guide across the standards your furniture products should meet.

Important cautions

Input grades (for example boiling-water-resistant plywood) and finish and emission quality strongly affect durability, safety and B2B and export acceptance. Institutional buyers and tenders often specify standards and testing. Verify current standard references and any mandatory requirements for your products.
