ERP / Retail Software Selection

Furniture & Home Furnishings

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Helps choose ERP or retail and manufacturing software for a furniture business — inventory, orders, production, POS, accounting and integrations — with an evaluation approach. Use it to pick core software. For catalogue tools use the Catalogue & Design Software tool.

Purpose of this tool & output

Choose software to run the business

How the output is used

Use it to choose software to run the business — an ERP and retail software selection guide across features, integration and cost.

Important cautions

Prioritise inventory, order or custom-order tracking, GST billing and accounting integration over flashy features — an over-complex system fails on adoption. Ensure e-commerce and accounting integration if relevant. Pilot and check support before committing, and match to your actual scale.

Companion documents

- Catalogue & Design Software
