

Finish, Laminate & Upholstery Selection

Furniture & Home Furnishings

Document type: Plan / SOP / strategy / guide · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Guides choosing finishes, laminates and upholstery for furniture — options, durability, look, cost and maintenance — matched to product and use. Use it to specify finishes. For materials use the Material & Wood Selection Guide.

Purpose of this tool & output

Choose finishes that look good and last

How the output is used

Use it to choose finishes that look good and last — a finish, laminate and upholstery selection guide across look, durability and cost.

Important cautions

Finish quality drives perceived value and durability — premium looks like acrylic or PU cost more, while durability, moisture and scratch resistance and easy cleaning matter for heavy home use. Application quality and edge-banding make or break the result. Use safe, compliant coatings and adhesives.
