

Machinery & Tools Selection

Furniture & Home Furnishings

Document type: Plan / SOP / strategy / guide · Generated 28 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Helps choose woodworking machinery and tools for a furniture factory — by products, volume, budget and manual-versus-automated trade-offs — with a recommended set. Use it to plan capex. For ROI use the Product Cost & Margin Calculator and Funding tools.

Purpose of this tool & output

Choose the right woodworking machines

How the output is used

Use it to choose the right woodworking machines — a machinery and tools selection guide across capacity, quality and after-sales.

Important cautions

Match machinery to realistic volume — CNC and automation only pay off at scale, while dust extraction and safety guarding are essential from day one. Used machines can cut capital but check condition. Buy core capability now and outsource specialised work until volume justifies it.

Companion documents

- Factory Setup & Layout
- Production Workflow SOP
- Quality Control & Finish Standards
- Wood Seasoning, Treatment & Anti-Termite
- Production Planning & Capacity
- Material Yield & Waste Reduction
