

Furniture Model Selector

Furniture & Home Furnishings

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Compares furniture business models — manufacturing, retail, modular, home furnishings, D2C, export — on capital, margin, skills, competition and risk, and recommends a fit. Use it to choose direction. For setup use the Furniture Business Setup Guide.

Purpose of this tool & output

Choose manufacturing, retail, modular or online

How the output is used

Use it to choose manufacturing, retail, modular or online — a furniture model selector against your capital, skills and market.

Important cautions

Each model has very different capital, inventory and skill demands — manufacturing and retail are inventory-heavy, modular is project-cash-cycle driven, online adds logistics and damage risk. Match to your capital, skills and market. Validate demand before committing.
