Furniture & Home Furnishings

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Guides designing a modular kitchen or wardrobe — layout, ergonomics, modules, materials, hardware and costing — from a client brief and space. Use it to design modular units well. For quotation use the Modular Quotation & Estimation tool.

Purpose of this tool & output

Design modular kitchens and wardrobes

How the output is used

Use it to design modular kitchens and wardrobes — a modular kitchen and wardrobe design guide across layout, modules and hardware.

Important cautions

Modular kitchens face moisture and heavy use — use moisture-resistant carcass material (boiling-water-resistant or marine plywood) and quality hardware, since cheap hinges and channels fail fast. Balance design with durability and budget. Verify site dimensions precisely before finalising.
