

Modular Quotation & Estimation

Furniture & Home Furnishings

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a modular kitchen or wardrobe quotation and estimate from the design and discrete rate inputs — carcass, shutters, hardware, accessories, appliances and installation. Use it to quote right and protect margin. For costing use the Product Costing & Bill of Materials tool.

Purpose of this tool & output

Quote modular jobs accurately and profitably

How the output is used

Use it to quote modular jobs accurately and profitably — a modular quotation and estimation tool that builds price from modules, hardware and margin.

Who should vet it

Your CA or finance lead, to confirm the module, hardware and margin inputs before you quote a modular job.

Important cautions

Modular quotes are commonly under-priced by missing hardware, accessories, installation and site-variation allowances — itemise everything and state inclusions and exclusions clearly (civil, electrical, plumbing). Protect margin and set advance and payment stages. Verify site measurements before finalising.
