

Segment & Niche Selection

Furniture & Home Furnishings

Document type: Plan / SOP / strategy / guide · Generated 28 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Helps choose a furniture segment or niche — by style, category, price point, customer and competition — with a recommended focus. Use it to specialise rather than spread thin. For the wider choice use the Furniture Model Selector.

Purpose of this tool & output

Pick a furniture niche you can win

How the output is used

Use it to pick a furniture niche you can win — a segment and niche selection across product, price and customer.

Important cautions

A focused segment, recognisable style and clear price positioning win against big brands and undifferentiated local players. Choose where demand, your craft or sourcing strengths and margin align, not just where volume looks large. Validate demand with real customers or designers.
