

Site Measurement & Design SOP

Furniture & Home Furnishings

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Writes an SOP for site measurement and design capture for modular and fitout work — measurements, services, checks and sign-off — to prevent costly errors. Use it to standardise site work. For quotation use the Modular Quotation & Estimation tool.

Purpose of this tool & output

Measure sites accurately every time

How the output is used

Use it to measure sites accurately every time — a site measurement and design SOP that prevents costly rework.

Important cautions

Inaccurate site measurement is the top cause of modular rework and loss — measure precisely, capture all services and constraints (plumbing, electrical, appliances), allow tolerances, and get customer sign-off before manufacturing. Re-check critical dimensions. Adapt the SOP to your work type.
