

Sustainable / Certified Materials

Furniture & Home Furnishings

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Guides using sustainable and certified materials in furniture — certified wood, recycled and low-emission materials, and how to substantiate green claims. Use it to build a credible sustainable range. For range planning use the Product Range & Catalogue Planning tool.

Purpose of this tool & output

Use greener materials and tell that story

How the output is used

Use it to use greener materials and tell that story — a sustainable and certified materials guide across options, certification and messaging.

Important cautions

Sustainability can differentiate for conscious and export buyers, but claims must be substantiated (certification, genuine recycled content, low-emission materials) — vague or false green claims are greenwashing and risk reputation. Certified materials can cost more and be less available; balance against your segment and budget.
