

Vendor / Karigar Network Management

Furniture & Home Furnishings

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a system to manage a network of vendors, karigars and outsourced makers — onboarding, rates, quality, capacity and relationships — for reliable supply. Use it to run your maker network. For job-work specifically use the Karigar / Job-Work Management tool.

Purpose of this tool & output

Manage your maker and supplier network

How the output is used

Use it to manage your maker and supplier network — a vendor and karigar network management approach across quality, capacity and terms.

Important cautions

A resilient multi-vendor network avoids capacity crunches and single-vendor dependence, but needs consistent quality standards and inspection across vendors and fair, timely payment to retain reliable makers. Skilled karigars are scarce; treat them well. Plan capacity ahead of seasonal peaks.
