

RMG Payments & Fund-Flow Setup

Gaming, Esports & Digital Entertainment

Document type: Plan / SOP / strategy / guide · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a payments and fund-flow design for a real-money platform — gateway/UPI integration, deposit/withdrawal flows, player-fund segregation/escrow, GST/TDS deduction points and reconciliation. Use it to build compliant money handling. For player-fund protection depth use the Player Fund Protection tool.

Purpose of this tool & output

Handle deposits, withdrawals and prize funds

How the output is used

Use it to handle deposits, withdrawals and prize funds — an RMG payments and fund-flow setup that is compliant and reliable.

Important cautions

Real-money fund flows must segregate player balances from operating funds and correctly account GST (on deposits) and TDS (section 194BA on net winnings) at the right points — errors here are serious compliance and trust failures. Engage specialist tax and legal advisors; this is guidance, not tax/legal advice.
