

# Making Charge & Price Build-up

Gems & Jewellery

Document type: Financial model / analysis · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

## Background

Build up the price of a jewellery piece — metal value, stone value, making charge (per-gram or percentage), wastage, GST — to a transparent final price, so you price consistently and profitably. Enter the piece and inputs below.

## Purpose of this tool & output

Price a piece transparently and profitably

## How the output is used

Use it to price a piece transparently and profitably — a making-charge and price build-up from metal, stones, making and margin.

## Who should vet it

Your CA or finance lead, to confirm the making, wastage and margin components in the price build-up.

## Important cautions

AI-generated build-up; use the live gold rate and your making/wastage policy, and disclose the breakup to the customer.
