

Jewellery Product Costing

Gems & Jewellery

Document type: Financial model / analysis · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Build a manufacturing cost sheet for a jewellery piece — metal (with wastage), stones, labour/making, and overhead — to the true cost, so you set making charges and margins correctly. Enter the piece and cost inputs below.

Purpose of this tool & output

True cost of making a piece

How the output is used

Use it to find the true cost of making a piece — metal, stones, making, wastage and overhead in one costing.

Who should vet it

Your CA or cost accountant, to confirm the wastage and overhead in the product cost.

Important cautions

AI-generated cost sheet; use your actual metal loss, labour and rates.
