

Jewellery Quality Control SOP

Gems & Jewellery

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produce a quality-control SOP for jewellery — purity/caratage verification, stone setting and security, finish and weight, and hallmark readiness — so pieces meet standard before sale. Describe your products below.

Purpose of this tool & output

Inspect purity, setting and finish

How the output is used

Use it to inspect purity, setting and finish — a QC SOP that catches defects before a piece reaches the customer.

Important cautions

AI-generated SOP; align purity checks with hallmarking requirements.
