

Tagging & Barcoding System

Gems & Jewellery

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get a plan to set up a tagging and barcoding system for jewellery stock — tag data (weight/purity/HUID/price basis), tag types, integration with billing/ERP, and re-tagging on rate change — to speed billing and tighten control. Describe your setup below.

Purpose of this tool & output

Tag every piece for control and speed

How the output is used

Use it to tag every piece for control and speed — a tagging and barcoding system that ties each piece to weight, purity and price.

Important cautions

AI-generated plan; ensure tags carry HUID and price links to live gold rate.
