

Hospital / Clinic Empanelment Application (B2G)

Document type: Licence / statutory filing · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Prepares an empanelment application for a hospital, clinic or diagnostic centre to join a government or insurer network — PM-JAY, CGHS, ECHS, a state scheme or a TPA/insurer panel — assembling the infrastructure, manpower, accreditation and compliance dossier that the empanelment criteria demand.

Purpose of this tool & output

Prepare a hospital or clinic empanelment application for PM-JAY, CGHS, ECHS or an insurer network, with the infrastructure and compliance dossier

How the output is used

Use the criteria mapping, the gap analysis and the compiled dossier to submit the empanelment application to the scheme or network, close the identified gaps, and prepare for the inspection and the empanelment agreement.

Who receives it

The scheme authority (the State Health Agency for PM-JAY, the CGHS or ECHS authority, or the insurer or TPA), with the application and dossier.

How to submit / file it

Submit the empanelment application with the infrastructure, manpower, accreditation and registration documents, undergo the inspection, and sign the empanelment agreement with the package rates.

Fees & charges

Any empanelment or processing fee set by the scheme or TPA; the cost of closing accreditation or infrastructure gaps is separate.

Who should vet it

A hospital-administration or empanelment consultant — to map the criteria, close the gaps and present the dossier for the specific scheme.

Important cautions

Empanelment turns on meeting the specific bed, specialty, accreditation and compliance criteria, and a gap or a weak dossier delays or denies it; the package rates affect viability. Verify current criteria with the scheme authority or TPA.
